WEEKLY PRODUCT PULSE LOG — 2026-10-13

TOP THEMES

1. Performance & Stability
2. Customer Support & Account Issues
3. Fees & Charges

WEEKLY PULSE

▸ Top Themes

• Performance & Stability: frequent slowdowns, freezes, blank screens, charts not updating, market-open failures.

• Customer Support & Account Issues: long response times, automated/unresolved tickets, KYC/SIP/refund delays.

• Fees & Charges: perceived high/hidden brokerage, external charges, MTF haircut and interest confusion.

▸ What Users Are Saying

• "Good app . but some time app was freezing." — Play Store user

• "worst customer service. Took more than 2.5 hrs for one response and for next response it took around 30 mins" — Play Store user

• "user friendly.. But Brokerage charges are too high. If monthly package means could be better for F&O" — Play Store user

▸ Key Observation

Negative feedback clusters around reliability at market open and slow, automated support workflows that increase churn risk. Fee-related confusion is acute: users report unexplained "hidden" or external charges (service fees, brokerage, MTF haircut) and cannot find clear breakdowns in the UI or confirmations.

▸ Action Ideas

• Implement real-time monitoring alerts for market-open latency and an automated incident/status page for users.

• Simplify fee display in order confirmations and account statements with explicit breakdowns for brokerage, external charges, and MTF interest/haircut.

• Reduce support SLAs by routing high-priority trade/account tickets to a fast-track team and publish expected resolution times.

IDENTIFIED FEE ISSUE

Fee: Hidden / external charges (brokerage / service charge / MTF haircut)

What users misunderstand: Users believe Groww is deducting unexplained or excessive 'hidden' or 'external' fees (service charges, high brokerage, haircut on leveraged stocks) that are arbitrary and not clearly shown or justified in the UI.

EXPLANATION (support snippet)

- “Hidden” or “external” charges are a label for third-party and statutory levies (exchange/clearing fees, stamp duty, GST, DP charges) rather than an arbitrary extra created by the app.
- Brokerage, transaction and platform fees vary by product/segment and order type and are published on Groww’s pricing page and shown in the contract note for each trade.
- MTF (margin trading facility) haircut is a risk-based reduction in the value of securities accepted as collateral by the margin provider or exchange, which lowers usable margin and can lead to margin calls or square-offs, rather than being a separate cash fee charged to your P&L.
- Statutory charges such as stamp duty, GST and exchange/clearing levies are imposed at prescribed rates and appear separately in your trade confirmations and account statements.
- If an unexpected amount appears, the contract note and transaction history provide a line-by-line break-up so you can see which items are platform charges and which are external levies.
